PROFILE

As a fresh Computer Science graduate with hands-on experience since I graduated from high school. I have a solid background in building data centers according to TIA, SNI, and Uptime standards. My experience includes a comprehensive understanding of network infrastructure, electrical systems, and green building principles. Additionally, I completed an internship as a programmer, which broadened my expertise in software development and IT.

I am highly adaptable, eager to develop my skills in alignment with company needs, and capable of working both independently and as part of a team. My technical competencies, combined with my flexibility and commitment to continuous improvement, make me a candidate ready to contribute in any professional environment.

EXPERIENCE
